

RADICAL IDEOLOGIES THREATEN YOUR FAMILY'S WELL-BEING!

Social Justice, Progressive Prosecution, Open Borders, Radical Gender Ideologies, and Critical Race Theory are producing dire real-world consequences for our country. National Conservative is working to educate the public on the dangers of these ideologies.

Missouri experienced a dramatic explosion of homicides as the murderous BLM/Antifa riots ripped through America in 2020. It was one of five states that set brand new homicide rate records that year.

The reason for this explosion of violence is no secret. Across America, social justice ideologies are now prioritized over public safety. Self-described progressive prosecutors are refusing to hold criminals accountable. Often, these prosecutors brag that the local inmate population is down, even as crime rises. Many, such as former St. Louis chief prosecutor Kim Gardener, have their campaigns funded by multi-billionaire George Soros.

Recently, researchers at the University of Colorado found that Missouri had the fifth-highest rate of mass shootings. We further analyzed the same data set they used. St. Louis and East St. Louis had the top two highest average annual rates of any cities in the USA larger than 10k people.

Cities like Portland, Seattle, San Francisco, and Minneapolis have all been testing grounds for these radical ideologies. National Conservative has been documenting the dramatic decline in the quality of life as a result. Our work is being picked up and amplified by major social media influencers and even by some politicians and media. You can play an essential role in helping us grow and reach new audiences.
