

# A conservative group that speaks out on what really matters.

The intellectual battle for the future of America and the entire Western world is being waged on social media. National Conservative leads the way by providing the activist community with detailed studies and research. This data-driven ammunition enables activists to dismantle the false narratives propagated by the media and politicians. We fearlessly tackle controversial topics that "Conservative Inc." avoids.

The radical left is attempting to censor the internet across the Western world because they know they cannot debate us. We understand how to navigate censorship and maximize our impact.

Our team comprises activists with decades of experience and pioneering roles in conservative online media. Our webmaster, with 30 years of website-building experience, was once credited by former CNN investigative journalist Amber Lyon with "changing the national narrative" on Trayvon Martin.

Our strategy is to stand at the edge of the Overton Window, mounting the most aggressive effort to restore the country to sanity, while moving with the Overton Window without alienating people along the way.

*“Innocent men, women, children hung by a noose from trees. Lynched for simply being Black, nothing more. Hard to believe, but that’s what was done. And some people still want to do that.”*  
- Former President Joe Biden

In 2023, a sitting president of the United State told Black audiences that White people were out to get them on at least two different occasions. This is a popular narrative among tv shows, Hollywood movies, college professors, teachers, left-wing non-profits, and major politicians.

Biden’s incendiary remarks prompted National Conservative to launch the open source Interracial Homicide Tracking Project. This is now the largest study on interracial homicide ever conducted. We have documented over 3,700 confirmed interracial homicides beginning on 1/1/23.

In our study, Black on White homicides make up 38.8% of all interracial homicides, the largest component by a huge margin. Behind that is Black on Latino, making up 15.5%. White on Black homicide is not even in third or fourth place. Latino on White homicides are another 12.5%, and Latino on Black are 7.9%. White on Black is only 7.6%. In fact, Whites make up 52.8% of the victims, but only 14.3% of the perpetrators of interracial homicide. Yet White on Black homicides are the most aggressively hyped.

In our study, 56.7% of all suspects in interracial homicides are Black. This is validated by the DOJ’s data. In 2023 and 2024, the DOJ’s UCR has reported that Blacks made up 56.3 and 56.4% of all known homicide suspects nationwide.

*“I would say our country should be more fearful of white men across our country because they are actually causing most of the deaths”*  
- US Congressman Ilhan Omar
